Professional Experience

Cassol Centerlar – *Developer*

May 2025 – Current

- Work on the development and evolution of a Transportation Management System (TMS), implementing REST APIs and functionalities in microservices architecture using Java (Spring Boot/Java EE), Go and Angular.
- Development and maintenance of REST APIs, system integrations and backend services, with focus on scalability, performance and maintainability.
- Modernization of legacy applications through the creation of responsive and dynamic interfaces in Angular, contributing to improved user experience and adoption of modern architectures.
- Development of automation and Artificial Intelligence solutions using Python (FastAPI, Pandas and AI agents) for optimization of internal processes and increased operational productivity.
- Participation in corporate integrations between ERP systems, TMS and external services, ensuring reliability and consistency in data exchange.
- Use of AI-assisted development tools, such as Claude Code, to accelerate feature implementation, automate repetitive tasks, reduce technical debt and increase team productivity while maintaining code quality standards.

Cassol Centerlar – *Data Analyst*

April 2023 – May 2025

- Development and monitoring of key performance indicators (KPIs) focused on logistics and delivery costs, using Excel and Power BI, to support strategic decisions focused on cost reduction and service level improvement.

- Creation and optimization of SQL queries for extraction, manipulation and analysis of large volumes of data, ensuring accurate and agile information for the generation of reports and management dashboards.
- Process automation in Python for customer communication, validating delivery data and reducing returns, which resulted in reduced logistics costs and improved service levels. Additionally, implementation of a messaging system for sending satisfaction surveys, enabling continuous evaluation of customer experience in the NPS model, reaching over 1,000 customers per day with reduced cost for the company.
- Development of Excel tools with SQL and VBA, enabling integration of information from multiple platforms and automating operational tasks, making data analysis faster, more efficient and accessible for the team.
- Technical mentoring for new employees, sharing knowledge about SQL, Excel, business rules and application development, accelerating the learning curve and improving team productivity.

Cassol Centerlar – Logistic's Intern

June 2022 – April 2023

- Support for logistics operations, assisting in data management and development of initial reports.
- Gained practical experience in logistics and transportation data analysis.

Vetto AI – Testador Freelancer de QA

March 2026 – Jun 2026

- My main responsibilities involve analyzing AI-driven conversations based on predefined personas and contextual scenarios. I assess whether AI responses are accurate, coherent and aligned with user intent, while also verifying the model's ability to correctly interpret and adapt to different personas.

- Development of a web application in Next.js for a client, using JavaScript, HTML and CSS.

The project included:

- Login screen with authentication via the contracting company's API, ensuring secure access.
- Interactive report page, where users could view dynamic data in table format, obtained through API requests.
- Excel export functionality, allowing users to download data according to their needs.

Education

Bachelor's Degree in Computer Science

Universidade do Sul de Santa Catarina

January 2023 – July 2027 (Presente)

Skills

- **Java (8–21+):** Spring Boot, Spring Data JPA, Hibernate, Java EE/Jakarta EE, JSF, Maven, REST APIs, concurrent programming (CompletableFuture, ExecutorService), Collections and Streams.
- **Database:** Oracle, Snowflake, SQL, data modeling, query optimization, ETL.
- **Architecture:** Microservices, REST APIs, system integration.
- **Frontend:** Angular (21+), TypeScript, Micro Frontends (Native Federation).
- **Python:** Pandas, FastAPI, Flask, automation and AI agents.
- **Golang:** Microservices development.
- **BI & Automation:** Power BI, Excel, VBA.
- **Methodologies:** Scrum, Kanban.
- **Languages:** Professional English and Basic Spanish
